

Practical examples of Farrat products within steel & concrete frame buildings

Wind Turbine Masts
Structural Damping Gaskets
Anti Vibration Washers
Anti Vibration Bushes

Steel Structure
Acoustic Structural Bearings
Vibration Isolation
Structural Damping
Rotation
Slide (Optional)
Anti Vibration Washers
Lateral Restraint Pads

Isomat Acoustic Floating Floors
Tuned Natural Frequency Performance
Variable Acoustic Air Gap
Flexibility in Design & Installation
Steelwork Anti Vibration (Acoustic) Pads, Washers & Bushes

Isolation Strips for Stairs & Walls

Acoustic Structural Bearings
for Building Structure
Vibration Isolation

Farrat Vibration Isolation Product
Farrat Thermal Break Connection

Rail Sub Ballast
Vibration Isolation Layers

Plant / HVAC Equipment Isolation
Anti Vibration Materials & Mounts
Isolated Foundations & Plinths

Thermal Break Connection Plates
Cold Bridge Isolation
High Compressive Load Bearing
Capacity

Concrete Structure
Slide Bearings
Resilient Sealings
Rotation
Structural Damping
Load Spreading
FAVIM Acoustic, Under
Screed Resilient Layers

Acoustic Structural Bearings
for Structure Borne
Vibration Isolation

Recording Studios, Plant Rooms, Nanotechnology Facilities, Premium Residential etc.
Box in Box Systems
Decoupling Entire Room from Surrounding Building Structure
Isomat Acoustic Floating Floors
Walls & Ceiling Built off the Floating Floor

FARRAT ISOLEVEL LTD is a leading player in the design, manufacture and supply a wide range of **vibration, acoustic, shock and thermal isolation products** as well as machine mounting solutions that are used throughout the building design & construction industry as well as in industrial applications.

As an engineering company we strive to create solutions that meet or exceed the technical and commercial requirements and as a product supplier we aim to provide a high level of product quality, delivered on time and at a fair price.

The product range is based on 50 years experience in solving all manner of problems in industrial buildings, cinemas, theatres, concert halls, night clubs, tv & radio recording studios, hospitals, universities, schools, sensitive, test & nanotechnology facilities, residential etc.

Products & Applications include:

Anti-vibration materials

Manufactured by Farrat in various grades to suit the application: Neoprene, Isomat, Natural, Nitrile, Cork, FAVIM Recycled

Acoustic under screed Resilient layers

FAVIM Acoustic

Structure Borne Vibration Isolation

Structural Bearings, Resilient Seatings, Slide Bearings

Steelwork Vibration Isolation

Anti-Vibration Pads, Washers & Bushings

Isomat Acoustic Floating Floors

HVAC & M&E Solutions

Inertia Blocks

Low Frequency Coil Spring and Elastomeric
Anti-Vibration Mounts

Isolated Foundations

Elastomeric
Coil Spring & Damper

Machine mountings

Anti-Vibration & Precision Levelling

Thermal Break Connection Plates

High load TBG 300
Medium load TBN 100

Why use Farrat Isolevel:

- Comprehensive product range.
- Much of the range is manufactured by Farrat ensuring high quality, supply flexibility and bespoke / prototype products.
- Much of the range is kept on stock for quick dispatch.
- 50 years of applied experience.
- A talented, motivated team able to provide complimentary technical advice and develop technical solutions.

Farrat are happy to offer technical advice and system design input. Please contact us to discuss specific requirements.
