

Farrat

Shock & vibration isolation
for Plant, Machines,
Structure and Buildings

Since 1959 **Farrat Isolevel Ltd** has amassed a wealth of experience in all aspects of vibration, noise and shock isolation in both industrial and civil applications. Projects like this demonstrate our abilities as an engineering and manufacturing company. Farrat can advise on or develop bespoke vibration isolation and precision levelling solutions.

Please contact us for more detailed information and literature or technical advice on how best to overcome noise and vibration problems. Otherwise visit our website www.farrat.com.

Installation solutions incorporating passive vibration isolation for sensitive test equipment for the automotive industry.

Farrat has a long and successful track history with the automotive industry supplying products and solutions for machinery installations such as presses and CNC machines as well as passive isolation of sensitive test equipment. Each installation posed different requirements and in each case Farrat worked with the equipment suppliers, end users, structural engineers and contractors to achieve a successful result. The following 7 projects demonstrate some of these successes.

	Test Equipment	Farrat Product / Solution
1	Mileage Accumulation Test Rig	Wedge Level Mounts
2	Ride Simulator	Isolevel Pneumatic Systems
3	Radiator Vibration Test Facility	Farrat Foundation Isolators
4	Engine Dynamometer Test Bed	Spring Mounts and Inertia Base Forms
5	Anechoic Chamber	Farrat Foundation Isolators
6	Body Co-ordinate Measuring Machine	Isolevel Pneumatic Systems
7	Rolling Road set in Foundation	Isomat Foundation Isolators
