

Farrat

Shock & vibration isolation
for Plant, Machines,
Structure and Buildings

Since 1959 **Farrat Isolevel Ltd** has amassed a wealth of experience in all aspects of vibration, noise and shock isolation in both industrial and civil applications. Projects like this demonstrate our abilities as an engineering and manufacturing company. Farrat can advise on or develop bespoke vibration isolation and precision levelling solutions.

Please contact us for more detailed information and literature or technical advice on how best to overcome noise and vibration problems. Otherwise visit our website www.farrat.com.

Structural vibration isolation TV recording studio within university building

A new structure to house a TV recording studio for students at the university was to be connect to an existing building.

Farrat Squaregrip and Neoprene Elastomeric Bearings were used as flexible couplings between the two buildings, throughout the steel frame of the new building and as part of the cladding fixtures. This was to ensure that no structure-borne or re-radiated noise would affect the productions.
