To whom it may concern,

Re: Design, Supply and Installation of Acoustic Floor

In early 2020 we approached Farrat with regards to the acoustic floor that was required at the new Premier Inn site in Shoreditch.

We found Farrat staff to be very knowledgeable and co-operative throughout the course of the project.

Farrat's approved installers, AcouStruct carried out the installation of the CineFLOOR PRO system on time and on budget. From project management to their site operatives they have been thoroughly professional in their conduct which has resulted in a high-quality installation to the delight of our client.

We have enjoyed an excellent working relationship with both Farrat and AcouStruct and look forward to working with them on future projects.

Yours Sincerely
