To whom it may concern:

5th March 2018

We appointed Acostruct to carry out the design and installation of a high mass cast concrete floating floor to our new Build project in Bognor Regis for Chichester University TV Studio.

I am very impressed by their design approach, site installation, H&S documentation and site implementation and will continue to use them on future projects without hesitation.

This is a great company with a keen eye on detail, competitive pricing and an excellent product performance.

Keep up the good work guys!

Yours sincerely

Peter Keeling
Managing Director
