Warrington

WA1 2FA

To whom it may concern,

Vinci Construction appointed AcouStruct Ltd to carry out the design, supply and installation of the Farrat CineFLOOR PRO system for the new 13 Screen Cineworld at Time Square, Warrington.

During their time on site, they installed:

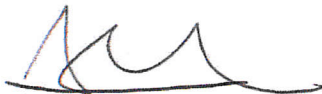

- Over 600m² of Farrat CineFLOOR PRO acoustic floating floors
- 1363m³ of voidformer as part of the non-acoustic flooring

Farrat CineFLOOR PRO was specified by the acoustic consultant due to its high acoustic isolation performance and AcouStruct were selected because of their professional approach during tendering.

AcouStruct carried out the installation on time and on budget.

We would have no hesitation in recommending Farrat or AcouStruct to others or use them ourselves on any further projects.

Yours Sincerely,

Adam Lynch
Senior Construction Manager
Vinci Construction
